

**MURDERED AND HAS HEART CUT OUT.**

(From Thursday's Daily.)

Passengers arriving here last evening from Globe state that as yet no case has been obtained as to the murderer or murderers of unfortunate Joseph Ludwig, a young miner, who some time early Sunday morning was slain to death by as yet unknown assassins, who, with a lust for blood, or in revenge, cut Ludwig's throat from ear to ear, and then, while life still lingered in the mangled body, cut his heart out as a trophy of their ghastly work.

Ludwig's body was found in a lonely canyon, about a mile from Globe, blown almost in two by a charge of giant powder, which the murderers had evidently set off in a vain effort to destroy the identity of their victim, but it has been positively established that Ludwig was not murdered in the canyon, but in town, his body afterwards being carried to that spot by the assassins, who left behind as evidence of their diabolical handiwork the mangled remains and the knife-hacked heart lying near by.

It has been established by the investigation of the coroner's jury that Ludwig was last seen alive on Friday afternoon, at which time a colored woman declares she saw him pass her home, presumably coming from his lodging house, the International, where he occupied Room 18.

Mrs. J. J. McInerney, who runs the place, testified that Friday afternoon, upon going to Room 18, she found Ludwig's bed saturated with blood and the floor freshly stained with the same fluid. The police were not notified of this, nor have they been able to account for Ludwig's time from Friday afternoon until Sunday, when his dead body was found.

A theory of suicide was advanced, some thinking that the miner had cut his own throat, and failing to kill himself, had repaired to the canyon to blow himself up with dynamite. The finding of his heart cut out, and the fact that a towel was wound around his gashed throat so tightly as to have choked him to death, disproves the suicide theory.

He was known to have had at least \$96, which has not yet been accounted for. Prior to meeting his death in such a horrible manner, he had been employed in the Little Johnny mine, at Globe.

He was not a "lady's man," but it is hinted that possibly a woman, with whom he has been seen driving a number of times, may be at the bottom of the murder, and the cutting out of the victim's heart lends an air of tragic romance to the affair, which, in the long run, may be the cause of the mysterious murder being cleared up.

**SHAFT NOW DOWN TO DEPTH OF 170 FEET.**

(From Thursday's Daily.)

Work is progressing satisfactorily on the new double compartment shaft being sunk by the Great Republic Gold and Copper company in the lower Turkey Creek district, according to the statement of J. M. Sullivan, president and general manager of the concern, who arrived here last evening from the company's camp.

"Our new shaft is now down to a depth of 170 feet," he said, "and we are pushing it down at the rate of two feet a day. The shaft, which is perpendicular, cut the vein, which dips at an angle of about 30 degrees, at a depth of 70 feet, and continued through it until the 100 foot station was reached. The ledge is stratified by a number of veinlets of copper sulphides, the entire filling carrying values in copper. It is the intention to cut a station when the 200 foot level is reached, where the vein will be tapped with a cross cut, and drifts run through it in both directions while the shaft is being sunk to a greater depth.

"As soon as a number of improvements are made in the camp, now under consideration by the directors," he continued, "the work of sinking the 725 foot shaft to the 1,000-foot level will be resumed, and extensive development of the mine continued, according to a plan which has been agreed upon."

In addition to the promising mineral holdings of the company the thirty-four locations comprising the group over water rights on Turkey Creek, where it is the intention later, and as soon as the development of the mine is far enough along to justify it, to erect a smelting plant.

**PFAU EXTENSION COMPANY RESUMES OPERATIONS ON PROPERTY.**

(From Thursday's Daily.)

After a period of inactivity covering several months, due to disagreements among the stockholders, the Pfauf Extension Gold Mining company resumed work on the company's properties in the Cherry Creek district last Monday, the directors of the concern having agreed upon an extensive plan of development, which involves the sinking

of a shaft to a depth of several hundred feet and the opening of the vein by a series of drifts and cross cuts from the different levels.

For the present operations will be confined to the sinking of the shaft, which is now 100 feet in depth, the vein to be explored by drifts and cross cuts when the 200-foot level is reached, work to be continued without cessation in the shaft until much greater depth is gained. The showing in the mine is considered among the best in the district, which is noted for a large number of promising gold properties, under different stages of development, some of which have already entered the producing class.

The holdings of the company are located on the eastern slope of the Black Hills range, overlooking the Verde Valley, about sixteen miles in an easterly direction from Dewey, on the Bradshaw Mountain railroad, the nearest accessible railroad station, which is connected with the camp by the Verde Valley and Cherry Creek wagon road.

H. A. Ingalls, a mining man of many years experience in this Territory and Colorado, is general manager of the concern.

**MAKING GREAT PROGRESS ON THE COPPER CZAR MINE.**

(From Thursday's Daily.)

Great progress is being made in the sinking of the double compartment shaft on the Copper Czar mine, according to a reliable report which reached here yesterday. The 300 foot level has been already reached and work on the shaft is being vigorously pushed, it being the intention of the management to start an extensive system of drifting and cross cutting on the vein as soon as the 500 foot level is reached. A cross cut run from wall to wall at the 200 foot station showed the vein to be 96 feet in width, the filling being porphyry and slate, in which several quartz veins were cut, which carry high grade values in copper as well as gold and silver.

Besides the mineral rights controlled by the Copper Czar Mining company's locations the claims cover water rights with sufficient water for a large reduction plant.

The mine, which is under the management of E. W. McClave, is equipped with a 50-horse power gasoline hoist, and electric generator, which furnishes power for an electric pump used in the mine.

The concern has ample capital at its command to execute its plan of development, which is one of the most complete ever inaugurated in the district, and which is being carried out in accordance with the principles of modern mining methods.

**INSTALL MILL ON INDEPENDENCE GROUP.**

(From Saturday's Daily.)

Good progress is being made in the installation of the new Lane mill on the Independence group of mines in the Hassayampa district, according to the statement of J. A. Forbes, general manager of the mines, who was here yesterday on business.

"Within the next ten days we expect to have the mill running steady on ore from the mine," he said. "The mill has a capacity of about 30 tons daily, and there is enough ore already mined and on the dump to keep it in operation for several days. As soon as the mill is in running order a force of miners will be put to work in the mine, where there is a slope of over 100 feet in height, and almost 300 feet in length, blocked out and ready to be mined.

"The mine is opened," he continued, "by two tunnels over 300 feet in length, following the vein, which are connected by a winze, that has been sunk in the lower level to a depth of 70 feet, the paystreak in the entire workings showing to be continuous and over three feet in thickness, six inches of which is shipping ore of a high grade, the remainder being good milling ore. One car load shipment made from the mine averages returns of \$125 to the ton in gold; another gave returns of \$60, while a third gave returns of over \$80, the principal value being gold."

The Independence group of mines, consisting of four claims, is located about twelve miles south of this city, in the Jersey Lily neighborhood, within a short distance of the Prescott and Jersey stage road. The gold values are found in a quartz paystreak, associated with a porphyry vein filling, which is also highly mineralized. Water for the mill and domestic purposes is piped from a spring from a higher elevation on the mountain, about 3,000 feet distant from the camp, and mining timbers can be secured at a nominal cost from the summit of the range, about one mile from the mine.

**GREAT NICKEL PRODUCER.**

The famous Gap mine of Lancaster, Pa., was first opened in 1732. It produced some copper and was a source of nickel for a number of years, having been with one exception the only producer of nickel from 1732 to the present time, in the United States.

**FAMINE IN SPOT COPPER NOW PREVAILS.**

So far as spot copper is concerned, there is a famine. Lake and electrolytic is selling at 22 to 23 cents per pound. Sales of odd lots have been made at 23 cents, and round lots are known to have been sold at 22½¢.

Metal brokers declare that they have found it impossible to meet the requirements of their customers, and as a result, believe the price may go even higher. Twenty-five cent copper is now not only a possibility, but a probability.

The lull in the market has resulted from the recent sharp advance in "Standard" in London to around \$103 per ton, and the subsequent sharp decline of about \$4 per ton. This has frightened consumers somewhat and has caused them to withhold from making further purchases for future delivery.

A careful review of the world's operations in the metal leads one to believe that the 1906 production will not show an increase of over 6 or 7 per cent above that of last year. It is probable that the consumption is increasing at the rate of 15 to 25 per cent annually.

At the present time production is curtailed in every district in the United States by a scarcity of labor, lack of cars and inability to get fuel, timber, machinery and other supplies delivered promptly. These hindrances to expansion will probably cut into production considerably during the remainder of the present year.

A weakening, dragging tendency in the New York list has done much to discourage speculation in copper shares and prices in most cases are lower than they were two weeks ago. Some leading Republicans are known to believe that Hearst will be elected Governor of New York. If this should happen it would undoubtedly cause a sentimental decline in prices of stocks generally. This and the condition of the money market seems to be the only obstacles to an immediate and far reaching advance in copper share prices. At the moment it seems quite probable that prices may go somewhat lower between now and election.

**MADE ATTEMPT TO BRAIN W. W. ROSS.**

(From Saturday's Daily.)

"Rags," a quaint character of unkempt appearance, whose flowing locks fall in tangled disarray over his shoulders, and with a broad-brimmed hat of ancient lineage covering his cranium, was arrested yesterday afternoon by Under Sheriff W. M. Neagle, and lodged in the county jail, after he had attempted to brain W. W. Ross, proprietor of a drug store on Cortez street, with an empty champagne bottle, because the latter would not pay him the second time for a consignment of bottles which he had previously sold the druggist, and for which he had received payment.

"Rags," whose proper name is shrouded in mystery, applied for a private room in the jail, after his incarceration, but owing to its crowded condition, could not have his luxurious whim gratified. It was not stated whether or not he applied for a room with a bath.

For the past year "Rags" has been making his home near the Chinese ranch, north of the city, eking out a miserable existence by picking up rags, bottles and bits of scrap iron, for which he found a market in the local business houses.

Sullen and morose of manner, but picturesque in all, "Rags" has been a familiar figure on the city's streets for some time past, where he was always viewed with wonder by strangers in the city, unacquainted with his history or occupation. He is thought to be of unsound mind.

With the exception of the attempt to assault Mr. Ross, yesterday, he has always been of a quiet disposition, and has never appeared dangerous at any time previous. It is thought he will be discharged from custody unless his insanity should take a violent turn.

**LOGOS GROUP HAS SOME FINE SHOWINGS.**

(From Monday's Daily.)

Located in the low and rugged mountains that skirt Big Bug Creek, near where it empties into the Agua Fria River, the properties of the Logos Mining company, in the opinion of Joseph Engle, who returned here yesterday from an extended stay in that section, are among the best surface copper and gold showings in the eastern part of the county.

"During the past few years," said Mr. Engle, "I have seen a large number of the mines and prospects of the eastern part of the county, none of which have any better surface showing than is found on the Logos group. The thirty-eight locations owned by the company cover a series of iron, porphyry and diorite dykes, cutting through the country formation, in all

of which veins have been opened carrying good values in copper and gold.

"A shaft is sunk on one of the iron dykes to a depth of 100 feet, in the bottom of which there is a vein of ore uncovered over seven feet in width, which could be treated at a profit in a reduction plant on the ground, and on a ledge following a granite and porphyry contact there is another shaft down 50 feet, in which there is a four-foot paystreak, a large portion of which samples as high as \$35 in gold to the ton.

"A cross cut tunnel is being run into the mountain to tap another vein in which there is an excellent surface showing in copper and gold ores, and the company is making preparations to commence the sinking of a double compartment shaft to a depth of 500 feet on another one of the series of ledges which it is proposed to develop from the shaft by a series of laterals run from each 100-foot station," he concluded.

The trend of all the veins, ledges and dykes included in the locations is from the northeast to the southwest. The company owns a water right on Big Bug Creek, in which is a never-failing supply of water the entire year around, from which a sufficient supply can be secured for a large reduction plant.

The camp is located about eight miles from Mayer, the nearest railroad station, with which it is connected by a good wagon road.

**HOISTING PLANT TO BE IN STALLED AT ONCE.**

With 250 feet of drifting and cross cutting done from the 85-foot level of the shaft in the Chronicle mine, the directorate of the Chronicle Mining company is so well pleased with the showing that a hoisting plant is to be installed at once and the sinking of the shaft to the 500 foot level resumed.

All of the laterals run from the shaft are in ore of average values from \$17 to \$20 to the ton, some of it assaying as high as 35 per cent in copper and \$10 in gold.

The property is located in the lower Lynx Creek section, about four miles east of this city, within a short distance of the Four-Mile house, on the Prescott and Black Canyon stage road. The holdings of the company embrace six claims, covering a vein running in a northerly and southerly direction, the copper stained croppings of which can be traced for the length of four locations. The ledge is cut by a series of shallow gulches, which were very rich in placer gold in the early days of mining here, and which find an outlet in Lynx Creek, also long noted for its rich and extensive deposits of placer gold.

One peculiar feature connected with the history of the place is the fact that the ground has been crossed by innumerable miners and prospectors since the discovery of Lynx Creek, in the early '60's, none of whom recognized its worth, it remaining for Joseph Engle to establish the fact that copper in paying quantities existed on the vein, by sinking a shaft to a depth of 20 feet on one of the claims now owned by the Chronicle company.

**TO BE ARRAIGNED SOON.**

(From Monday's Daily.)

Bemoaning the fact that he acted unwisely while under the influence of an overdose of "red eye," James H. Nichols, would-be newspaper man, who on October 24, after failing to negotiate a loan with the local newspaper fraternity, and a number of the capitalists and bankers of the city, passed a worthless check for \$15 in the Wellington, and later secured the cash for a \$20 bogus draft in the Palace, still languishes in the county jail, awaiting arraignment on the charge of uttering a false check, which will take place in the early part of the week, as soon as the Sheriff's office secures further evidence of his guilt, as well as information concerning his conduct in other cities, previous to his arrival here.

It will be remembered that Nichols made his escape from this city the morning following his questionable transactions at the Wellington and Palace, to be arrested two days later by the City Marshal in Phoenix, after he had secured another small amount in cash by a similar transaction from a Phoenix merchant, which he later made good.

It also came to light within the past few days, that J. P. Dillon, proprietor of the Dillon cigar store, had also been victimized to the tune of \$5 by Nichols, who represented to Mr. Dillon that he was a member of the Odd Fellows, and could be easily identified at the bank if he could make the acquaintance of some of the prominent members of the order here.

Nichols represents that he is acquainted with all of the members of Congress in the United States, and claims his residence as Washington, D. C.

**INDIANS ENGAGE IN DRUNKEN BRAWL.**

(From Monday's Daily.)

Yesterday afternoon, at the Indian camp north of the brewery, where about 100 Apache-Mohave Indians are encamped, occurred a bloody fight, between Henry Wilson, who, it is alleged, manufactures whisky at the camp, Tequon Wilson, his son, and the former's daughter, the three of whom attacked another Indian, nicknamed "Monkey," because the latter's actions did not meet with their approval.

As a result "Monkey," who used a sharp knife in the fracas, inflicted a serious wound on the old man, by cutting off the middle finger of his left hand, driving a hole through the palm of the same hand with the knife, and then, not satisfied with his bloody work, battered the old man over the head with a jagged rock, inflicting a number of scalp wounds.

Another Indian, who attempted to act as peacemaker, received a slash from "Monkey's" knife that laid open his left cheek to the bone. The son and daughter of the Indian, Wilson, escaped without any serious injuries, beyond a few bruises inflicted on the son. All parties engaged in the fracas were drunk at the time.

Under Sheriff W. F. Neagle went to the scene of the fight, and brought in about twenty-five Indians. After an examination in the court house yesterday, the old man, Wilson, his son, and "Monkey," who did the cutting, were locked up, to await a hearing today.

It is alleged by the Indians that the whisky with which they became intoxicated was manufactured at the camp, but this is disputed by others familiar with the facts, who assert the whisky was obtained from some of the local saloon men.

A rigid investigation will be inaugurated to ascertain the truth of the two statements.

**IMPORTANT STRIKE IN PRESCOTT MINE.**

(From Saturday's Daily.)

What is believed to be an important strike of ore was made in the Prescott mine, on the summit of Thumb Butte and Copper Basin divide, a few days ago, by S. H. Anderson, in his new shaft, at a depth of seventeen feet, where he uncovered a paystreak of ore over four feet in width, six inches of which samples over 100 ounces to the ton in silver, the remainder being second class ore of medium grade. Work is being pushed on the shaft, and the ore body shows every indication of continuity for the few feet opened.

The claim is developed by another shaft, which has been sunk on the ledge to a depth of eighty feet, in which there is also an excellent showing of ore, carrying good silver values, and from which several tons of shipping ore has been mined.

There are four claims in the group, which is located about six and one-half miles west of this city, a good wagon road leading from here to the camp. The Last Chance mine, near the S. F. P. & P. railroad, lies two miles to the north, while about the same distance south, along the summit of the range, the Derby and Eldorado mines, both with well developed ore bodies, are located.

Other promising properties are being developed in the district, which is among the best watered and timbered in the county.

**FAIR NOTES.**

Everything is now ready for the fair. Two large wings have been added to the addition to the Woman's Building, thus insuring room for exhibits.

Eighty large double stalls have been completed for the use of horses and cattle, and one additional horse barn has been completed. One barn has been turned into a poultry house, making two large poultry buildings.

Many fast horses are now on the grounds. Audubon Boy, considered the fastest horse in the world, is here—has already equalled the track record of 2:05¼, and will endeavor to lower the world's record during the fair.

Excursion rates will be given on all railroads. See your nearest railroad agent.

The fair is almost here! Make your arrangements to come and spend the entire week. Make this your vacation—meet your old friends—make new ones. Leave your business for one week and enjoy the greatest attraction ever held in Arizona. You will feel better able to resume your business after a week's vacation.

Remember all entries must be on file with the secretary by Monday, November 5. The exhibits can be sent to the fair grounds on Friday or Saturday before the fair, and on Monday, up to 9 o'clock a. m.

The grand parade will take place Monday morning at 10 o'clock, and the fair will then be opened.

**MINING APPLICATION NO. 194.**

—United States Land Office, Phoenix, Arizona, October 20, 1906. Notice is hereby given that the Stoddard Copper Company, by Isaac T. Stoddard, its attorney-in-fact, whose postoffice address is Phoenix, Arizona, has made application for patent to the Anglo-Saxon and Expansion Lode claims, Mineral Survey No. 2,307, situate in the Agua Fria Mining District, Yavapai County, Arizona, in approximately T. 12 N., R. 2 E., S. 8 & S. R. B. & M., described as follows: ANGLON-SAXON LODE — Beginning at Cor. No. 1, whence U. S. M. M. No. 1 bra. N. 56 degs 54 mins E. 4066.93 feet, thence S. 83 degs 30 mins W. 60 feet to Cor. No. 2, thence S. 6 degs 30 mins E. 1500 feet to Cor. No. 3, thence N. 83 degs 30 mins E. 600 feet to Cor. No. 4, thence N. 6 degs 30 mins W. 1500 feet to Cor. No. 1, the place of beginning. EXPANSION — Beginning at Cor. No. 1, whence U. S. M. M. No. 1 bra. N. 75 degs 29 mins E. 4213.9 feet, thence S. 83 degs 30 mins W. 600 feet to Cor. No. 2, thence S. 6 degs 30 mins E. 1500 feet to Cor. No. 3, thence N. 83 degs 30 mins E. 600 feet to Cor. No. 4, thence N. 6 degs 30 mins W. 1500 feet to Cor. No. 1, the place of beginning. The location notices of these claims are recorded in the Mining Records in the office of the County Recorder of Yavapai County, Arizona, as follows: Anglo-Saxon, Book 59 of Mines, page 283; Expansion, Book 59 of Mines, page 284. The adjoining claims are as follows: 1st S. E. of Copper Mountain Survey No. 440, and Copper Mountain Survey No. 439, on East, owned by applicant herein.

MILTON R. MOORE, Register.  
First publication October 24, 1906.

**SALE OF TIMBER — Washington, D. C.**

September 17, 1906.—Sealed bids marked outside "Bid. Timber Sale Application September 8, 1906, Prescott," and addressed to the Forester, Forest Service, Washington, D. C., will be received up to and including the 26th day of October, 1906, for all the surplus dead timber, standing and down, and all the live timber marked for cutting by the forest officers, on a designated area of 200 acres, more or less, located on Big Bug Mountain, within unreserved T. 12 N., R. 1 W., Prescott Forest Reserve, Arizona; estimated to be 50,000 ft. B. M. in scale, more or less, of yellow pine, sawing and mining timber, and 50 cords of green wood and 60 cords of dead wood. No bid of less than \$5 per M. ft. R. M. for saw logs and mining timber, and \$10.40 per cord for green wood, and \$10.25 per cord for dry wood will be considered, and a deposit of \$200.00 must accompany each bid. The right to reject any or all bids is reserved. Timber upon valid claims exempted from sale. For further information and regulations governing sale, address Frank C. W. Pooler, Forest Supervisor, Prescott, Arizona. A. K. Chittenden, Acting Forester.  
First publication, Sept. 28.

**SUMMONS.**

(No. 4496.)

In the District Court of the Fourth Judicial District, Territory of Arizona, County of Yavapai. Olive Erhardt Plaintiff, vs. Lada J. Erhardt, Defendant.

Action brought in the District Court of the Fourth Judicial District, in and for the County of Yavapai, Territory of Arizona.

The Territory of Arizona sends greeting to Lada J. Erhardt.

You are hereby summoned and required to appear in an action brought against you by the above named plaintiff in the District Court of the Fourth Judicial District, in and for the County of Yavapai, in the Territory of Arizona, and answer the complaint filed with the Clerk of this Court at Prescott in said County (a copy of which complaint accompanies this summons) within twenty days, (exclusive of the day of service), after the service upon you of this summons, if served in this county; in all other cases thirty days after the service of this summons upon you (exclusive of the day of service).

And you are hereby notified that if you fail to appear and answer the complaint as above required, the plaintiff will take judgment by default against you, and judgment for costs and disbursements in this behalf expended.

Given under my hand and seal of said Court, at Prescott, this 2nd day of October, A. D. 1906.

(Seal) J. M. WATTS,  
Clerk.

By SARA W. TREGO, Deputy.  
First publication, October 3, 1906.

**MINE WARNING NOTICE.**

Notice is hereby given that the undersigned, owner of the Nelman group of claims, and located about 30 miles west of Hillsdale and adjoining the patented claims of Lawler & Wells, in the Eureka mining district, Yavapai county, Arizona, will not be responsible for debts of any kind contracted for labor and improvements on said property while it is being worked under bond.
